

HISTORY YOU CAN TRUST

DECADES OF PROFESSIONAL EXCELLENCE

FOUNDATIONAL LEADERSHIP ANALYSIS

PROVEN LEADERSHIP IN GLOBAL INFRASTRUCTURE

Q3 Power is led by Roderick Kagy, a professional with a history of successful projects for Fortune 100 companies. From co-developing 31 patents to managing energy for global giants, the Q3 team ensures your facility stays powered 24/7.

TECH & BUSINESS LEAD

RODERICK KAGY

Former leader at Fortune 100 companies and founding partner of Innova Water.

01

A TRACK RECORD OF RAPID SUCCESS FORTUNE 100 LEADERSHIP

Roderick earned his stripes at Ciba-Geigy (Novartis AG), where he was promoted 4 times in just 5 years. This rise proves he delivers results in high-pressure, world-class environments.

02

INVENTOR AND TRUSTED INDUSTRY ADVISOR 31 PATENTS

Roderick co-developed 31 patents in industrial technology and has provided critical energy, water, and fuel solutions to leaders like Monsanto, Koch, and Dow.

HERITAGE: THE FOUNDING PARTNER OF INNOVA WATER

Roderick was the founding partner of Innova Water, pioneering the use of concentrated solar heat to purify water. This is the exact engineering Q3 Power uses today to generate electricity.

- BUILT SYSTEMS USED BY GLOBAL MARKET LEADERS
- MASTERED HEAT STORAGE FOR 24/7 RELIABILITY
- EXPERT IN MAKING COMPLEX TECHNOLOGY SIMPLE

INDUSTRIAL STRENGTH ENGINEERING

RELIABLE WATER & POWER

Roderick's team successfully managed massive heat projects for remote communities and huge factories long before Q3 Power was launched.

TESTED BY THE BEST

When companies like Dow and Koch need energy solutions, they look for experts. Q3 is built on that exact foundation of trust.

POWER THAT NEVER SLEEPS

Standard solar panels turn off at night, but Q3 Power uses a specialized "heat battery" to stay awake. By collecting heat instead of just light, we store energy during the day and release it at night. This allows your building to run on clean solar power 24/7.

39-DAY MARATHON

GUINNESS WORLD RECORD TEST

A planned test that proved solar can be a 24/7 primary power source. The system ran for 951 consecutive hours staying on through 39 sunsets and sunrises without downtime.

PROOF IT WORKS AROUND THE WORLD

LOCATION	POWER	LAND USED	TRUST FACTOR
Mojave Desert, USA	354 MW	~1,000 Acres	LASTS FOR 30+ YEARS
Dubai, UAE	700 MW	~3,000 Acres	24/7 WORLD RECORD
China Energy Grid	1,738 MW	~7,500 Acres	NATIONAL GRID STABILITY

SAVING SPACE WITH Q3 INNOVATION

Standard solar farms take up thousands of acres. Q3 Power created a design that packs all that power into a tiny space using 98% less land.

"The only system powerful enough to run your building that fits in your parking lot."

60:1

LAND SAVINGS

0.5 AC

REQ FOR 6MW

STAYS ON 24/7/365

High-tech buildings can't afford downtime. Q3 Power stays on all night long unlike regular panels.

BUILT-IN COOLING

We use extra heat from our system to run air conditioning for free, lowering your cooling costs.
